

New Mexico Regional Water Plan Update Recommended Future Strategies Checklist

Planning Region _____

County _____

Name _____

Address _____

Title _____

Email _____

Organization _____

Phone _____

Information listed below is being collected for the purpose of updating the regional water plans. Please indicate the future projects, programs, and policies (strategies) your organization recommends to be included in the update of the regional water plan. Strategies should address future water supply needs and water management challenges. The focus is on strategies that are well-defined and implementable in the next five years. However, longer term strategies that may take more time to develop should also be included.

Project / Program / Policy Description: *Projects* include Water system infrastructure, Wastewater system infrastructure, Watershed restoration, Water reuse, Water conservation, data collection (monitoring/characterization/studies), planning (preliminary engineering report, master planning, 40 year plan, other), Water rights (protection, acquisition, transfer). *Programs* include data collection, conservation, planning, other. For *policies*, identify general area of the policy (water rights, quality, conservation, other) and identify whether it is federal, state, or local and how it should be implemented (statutory change, regulatory change, develop guidance, other.) Please provide a detailed description below.

New Mexico Regional Water Plan Update Recommended Future Strategies Checklist

Project Lead _____

Partner(s) _____

Planning Phase: Indicate if this project is under development, initial planning has been completed and whether any planning documents have been prepared (e.g., Preliminary Engineering Report).

Cost: Provide a cost estimate to complete the entire project. For programs, provide an annual budget for the proposed program. For policies, describe the costs that would be incurred to develop and implement the policy.

Funding request: Indicate when a request for funding will be submitted (fiscal year) and the source of funding.

Timeframe and anticipated implementation: Explain duration of project, program, or policy development, which organization will implement the strategy, and when implementation is anticipated (fiscal year).
