

Setting the stage for the scenario

Trends we are confident in with no changes to current policies (with 2010-2025 change estimates)

Increasing uncertainty

- | | | |
|----|-------------------------|---------------|
| 1. | Population | +5% to +15% |
| 2. | Ag. Rights to Municipal | +50% to +100% |
| 3. | GW Storage | -5% to -15% |
| 4. | SW flows | +5% to -25% |

Potential implications

Consequences or Potential Catastrophes:

- Wildfire
- Natural variability
- Compact violations
- Water use restrictions
- Rio Rancho moratorium
- Minnow
- Water rates skyrocket
- Pueblo water rights
- Lifestyle changes
- Concrete river conveyance

Illustrative
(not predictive)
“no-action”
scenario

“Prediction is difficult,
especially about
the future...”
- Niels Bohr

Increasing uncertainty
